Please note:

- Can run 3, 4, or 5 days a week. Pick up where you've left off in terms of weekly runs and mileage.
- Mileage ranges allow you to do the higher end if you feel great, the middle if you feel average, and the low end if you feel tired so you can adjust to find your sweet spot given how your mind and body feel.
- Can convert your distance to time by multiplying your normal pace by each mile (i.e. 4 x 10 minute pace = 40 minutes)
- It is recommended to do a couple of tune up 5K/10K races before the half marathon to gain valuable experience in dealing with race day nerves.
- Recovery weeks are built in to improve your chances for staying healthy and recover enough for race day.
- Be sure to warm up intelligently and start super relaxed before gradually easing into your pace for EVERY workout to improve your running! Finish slow & loosen up after as well.

Quick Reference Guide

Training Phases

- Endurance Phase: main goal is to slowly build up endurance. Try to limit speedwork and hills. Focus on relaxed running.
- Strength Phase: to add strength by doing one hilly course a week along with an optional fartlek workout for speed.
- Peak Phase: to allow your body to recover and peak for the target race.

Key Terms

- O = Off Day/Complete Rest/ No cross training.** Active recovery such as foam rolling recommended.
- C = Cross training.** Strength training that works the glutes/hips/core is strongly recommended 1-3 times a week. Can also any non-weight bearing aerobic activities you enjoy such as aqua jogging, swimming, or spinning.
- R = Recovery Run.** Very relaxed effort over flat to rolling terrain or off the pavement for short duration. Stop every 5-10 minutes during the run to stretch and muscle floss to loosen up tight spots. Have fun!
- SL = Semi-long Run.** After 2 mile warm up, settle into a relaxed to moderate effort.
- L = Long Run.** After a 2 mile warm up, settle into a relaxed to moderate effort.
- H = Hill Workout.** After a 2 mile warm up, do a hilly route at moderate effort. Or, for a more concentrated workout, do 30 second to 2 minute hill repeats. Start with 3-6 minutes of 'climb' time and add 1-2 minutes each week.
- F = Fartlek.** After a 2 mile warm up, perform optional pickups during the workout where you run at 5K-10K race effort (i.e. moderately hard) for 1 minute followed by a 2 minute recovery jog. Start with 3-6 and add 1-2 every week.
- + = And Optional.** C+R means to cross train with the option of also doing a recovery workout.
- / = Or.** C/O means to either cross train or take the day off.
